§ 11 Legal Validity	8
§ 12 Transitional Provisions	9

§ 1 Qualification Profile

(1) The Master's program in "Polymer Chemistry" at the JKU Linz has been designed to provide a high level of academic and scientific education to qualify polymer chemists to work professionally in fields that include the development and characterization of new kinds of monomers and polymers.

(2) The Master's program provides fundamental academic and scientific knowledge and qualifies graduates to pursue professional careers that require the application of scientific knowledge and methods. Graduates will understand how to transfer new scientific knowledge, theory and methods to the working world, applying their knowledge to demanding activities and operations in various areas of manufacturing and plastics research.

(3) Graduates of the Master's program in "Polymer Chemistry" at the JKU Linz work intensively with the synthesis and characterization of new kinds of monomers and polymer products. Polymer products include elastomers, thermoplastics, and thermosets as well as functional polymers, plastic multifunctional materials, plastic fibers, composites and polymers contained in paints and adhesives.

(4) Graduates are mainly employed in various fields of R&D, as well as chemical synthesis and characterization, in the pharmaceutical and plastics industry, in construction, in the packaging industry, aerospace engineering, sporting goods production, automotive industry, electrical industry and the electronics industry. Skills in interdisciplinary thinking and enterprise are also emphasized.

(5) Graduates of the Master's program "Polymer Chemistry" acquire:

- Broad, solid, top quality education in the disciplines of natural and technical sciences
- Solid base knowledge in a variety of polymer related disciplines including:

- Polymer Chemistry
- Physical Chemistry of Polymers
- Polymerization Techniques and Technologies
- Materials Science and Characterizing Polymers and Synthetic Materials

(6) Graduates of the Master's program in "Polymer Chemistry" will become familiar and comfortable with base concepts in polymer synthesis, polymer modification and characterization: they are familiar with the basics of polymer manufacturing and the latest subject-specific research methods. Graduates have the ability to plan and assess various reactions and procedures in the area of polymer manufacturing and characterization. The comprehensive, hands-on program offered at the JKU Linz enables graduates to reliably handle the raw materials required for polymer manufacturing, as well as effectively use equipment to handle, manufacture and characterize polymer products. Graduates can conduct experiments and testing series, as well as observe and document systematically and thoroughly. Graduates are in a position to professionally interpret experimentally acquired data and view results in a larger context.

(7) The program offers sound, basic education designed to be consistent with the various demands of different occupations in the fields of polymer chemistry. In order to link theory and practice, students participate in lab courses, workshops corresponding to the lectures, and submit a final academic thesis. The scope of education in the context of the Master's program in "Polymer Chemistry" includes conveying modern strategies and methods designed to create, utilize and relay information.

(8) The Master's program in "Polymer Chemistry" at the JKU Linz includes a number of unique and exclusive features:

- Intensive support provided by diverse cooperation efforts with the plastics producing and processing industries
- Internationality by involvement of globally active companies in the degree program

- Access to the latest technical equipment at well-equipped polymer institutes
- Broad compilation of JKU institutes involved in the field of polymer science at the JKU
- Close cooperation with polymer engineering institutes

§ 2 Admissions

(1) In accordance with § 54 (1) UG the Master's program "Polymer Chemistry" belongs to the category of engineering degrees and is taught in English.

(2) The Master's program "Polymer Chemistry" is based on the Bachelor's programs in "Chemistry and Chemical Technology" (UK033/290), "Biological Chemistry" (UK033/663) and "Polymer Engineering and Technologies" (UK033/220) at JKU. Graduates of these Bachelor's programs are admitted to the Master's program without any restrictions.

(3) Graduates of related programs at Universities, Universities of Applied Sciences and other recognized national or international post-secondary educational institutions can be admitted to the Master's program if their degree programs are equivalent in content and scope to the Bachelor's programs in "Chemistry and Chemical Technology", "Biological Chemistry" or "Polymer Engineering and Technologies" at JKU. Equivalent programs are those in which the following subjects have been successfully completed in the stated minimum scope, whereby at least 3 ECTS must be in chemical lab/practical courses (chemistry laboratory work with one's own experimental activities):

(a) Equivalent to the Bachelor's program in "Chemistry and Chemical Technology":

- General and Inorganic Chemistry (22 ECTS)
- Analytical Chemistry (20 ECTS)
- Organic Chemistry and Polymer Chemistry (25 ECTS)
- Physical Chemistry (20 ECTS)
- Chemical Technologies and Process Engineering (15 ECTS)
- Mathematics and Fundamentals in Sciences (18 ECTS)

(b) Equivalent to the Bachelor's program in "Biological Chemistry":

- General and Inorganic Chemistry (14 ECTS)
- Analytical Chemistry (16 ECTS)
- Organic Chemistry (15 ECTS)
- Physical Chemistry (10 ECTS)
- Mathematics and Physics (14 ECTS)

(c) Equivalent to the Bachelor's program in "Polymer Engineering and Technologies":

- Chemistry (24 ECTS)
- Polymer Technology (30 ECTS)
- Mathematics and Physics (10 ECTS)

(4) In the event of admission under para. 3, it must be determined during the official admission process whether equivalent standard has been met in accordance to para. 3 lit. a, b or c and/or if the prerequisites for graduates of the Bachelor's degree program in "Chemistry and Chemical Technology", "Biological Chemistry" or "Polymer Engineering and Technologies" have to be applied.

(5) If the undergraduate degree is considered principally equivalent and requires only individual supplements to be considered equivalent, the Rectorate can approve admission and require the student to successfully pass examinations totalling a maximum of 40 ECTS. The student must pass the examinations during the course of the Master's program.

(6) Graduates of a Diploma program with a longer duration than a Bachelor's program can obtain recognition for examinations of the Master's program (see § 78 UG) to the extent by which the Diploma program (excluding the diploma thesis) exceeds the Bachelor's program.

§ 3 Structure and Outline

(1) The Master's program in "Polymer Chemistry" covers 4 semesters and consists of 120 ECTS, which are distributed among the following subjects:

(a) Subjects for graduates of the Bachelor's program "Chemistry and Chemical Technology"

Subjects	ECTS
Mandatory Subjects	52
Elective Subjects	29
Master's Thesis (incl. Master's Thesis Seminar)	26
Master's Examination	1
Free Electives	12
Total	120

(b) Subjects for graduates of the Bachelor's program "Biological Chemistry"

Subjects	ECTS
Mandatory Subjects	58
Elective Subjects	23
Master's Thesis (incl. Master's Thesis Seminar)	26
Master's Examination	1
Free Electives	12
Total	120

(c) Subjects for graduates of the Bachelor's program "Polymer Engineering and Technology"

Subjects	ECTS
Mandatory Subjects	60
Elective Subjects	21
Master's Thesis (incl. Master's Thesis Seminar)	26
Master's Examination	1
Free Electives	12
Total	120

(2) For free electives students have to pass examinations corresponding to 12 ECTS, which can be chosen from any recognized national or international post-secondary educational institution. The free electives shall provide additional skills beyond "Polymer Chemistry" and can be taken anytime during the Master's study.

(3) The recommended free electives courses are further courses taught in the Master's programs "Biological Chemistry", "Chemistry and Chemical Technology (CCT)", "Management in Chemical Technologies (MCT)" or "Polymer Technologies and Science (PTS)".

(4) The recommended study plans are listed in annex 1-3. This recommendation is based on a full-time program. Due to the academic requirements the degree program cannot be reasonably completed alongside a job or for those who have family care responsibilities.

§ 4 Mandatory Subjects/Modules

(1) The following mandatory subjects have to be completed successfully:

Code	Name	ECTS
497ADCH14	Advanced Chemistry for Polymer Chemistry	5
497PHCH19	Physical Chemistry of Polymers	5
497POCH19	Polymer Chemistry	12.5
497POTE19	Polymerization Techniques	8.5
497SOSK19	Soft Skills for Master Polymer Chemistry	6.5

(2) Graduates of the Bachelor's program "Chemistry and Chemical Technology" have to complete, as well as the mandatory subjects, listed in para. 1, additionally the subject "Bridge subject Polymer Chemistry for Bachelors of CCT" subject code: 497BRCH23, to the extent of 14.5 ECTS, graduates of the Bachelor's program "Biological Chemistry" additionally the subject "Bridge subject Polymer Chemistry for Biological Chemists", subject code: 497BRBC23, to the extent of 20.5 ECTS and graduates of the Bachelor's program "Polymer Engineering and Technologies" additionally the subject "Bridge subject Polymer Chemistry for Polymer Engineering and Technologies" subject code: 497BRPE19, to the extent of 22.5 ECTS.

§ 5 Elective Subjects/Modules

(1) Elective subjects have to be completed successfully according to sub-para.1 or 2:

1. The subject „Elective Polymer Materials and Synthesis“ or the subject „Elective Polymer Processing“ has to be chosen, whereupon graduates of the Bachelor's program "Chemistry and Chemical Technology" have to complete the chosen elective subject to an extent of 29 ECTS, graduates of the Bachelor's program "Biological Chemistry" to an extent of 23 ECTS and graduates of the Bachelor's program "Polymer Engineering and Technologies" to an extent of 21 ECTS.

2. Alternatively the subject Gender Studies to an extent of 3 ECTS and one of the two other elective subjects can be chosen. In this case graduates of the Bachelor's program "Chemistry and Chemical Technology" have to complete the other chosen elective subject to an extent of 26 ECTS, graduates of the Bachelor's program "Biological Chemistry" to an extent of 22 ECTS and graduates of the Bachelor's program "Polymer Engineering and Technologies" to an extent of 18 ECTS.

Code	Name	ECTS
497GEND16	Gender Studies	0-3
497EPMS23	Elective Polymer Materials and Syntheses	26-29/20-23/18-21
497EPOP23	Elective Polymer Processing	26-29/20-23/18-21

(2) Students must select only such courses from the Electives that have not already been completed as part of the Bachelor's program which qualified them for this post-graduate program.

§ 6 Courses

(1) The names and the types of all courses of the mandatory and elective subjects, as well as their ECTS, their duration in hours per week, their codes, their registration requirements, and their admission procedures (in case of limited availability of places) are described in the study handbook of JKU (studienhandbuch.jku.at).

(2) The possible types of courses, as well as the examination regulations are described in §§ 13 and 14 of the JKU statute (section "Studienrecht").

§ 7 Replacement of Subjects and Courses

Mandatory and elective subjects according to §§ 4 and 5, as well as courses according to § 6 (1), may be replaced to a total extent of 18 ECTS by other study specific subjects and courses upon student's request, provided that the purpose of academic professional preparatory training is not affected and the choice of the proposed subjects and courses seems reasonable with regard to the defined aims in the qualification profile, the academic context, as well as to the addition to the professional preparatory training. The application for the replacement of subjects and courses has to be filed by the Vice Rector of Academic Affairs.

§ 8 Master's Thesis

(1) Students of the Master's program "Polymer Chemistry" must complete a Master's thesis according to § 81 UG and § 36 of the JKU statute (Section "Studienrecht").

(2) The Master's thesis usually consists of experimental research, whose results are to be documented in the form of a written paper corresponding to an effort of 21 ECTS.

(3) The Master's thesis serves as a proof that graduates are able to perform scientific work autonomously and correctly in terms of methods and content. The topic of the thesis must be taken from the mandatory subjects listed in § 4 (1) with the exception of the subject "Soft Skills for Master Polymer Chemistry" or from the elective subjects listed in § 5 and must permit completion within a period of 6 months.

(4) The curricular committee may specify guidelines for the formal structure of a Master's thesis.

(5) Subject to agreement with the tutor (academic advisor), the Master's thesis can be submitted in English or German.

(6) In addition to the Master's thesis, students must pass the Master's thesis seminar with 5 ECTS.

§ 9 Examination Regulations

(1) The regulations for subject examinations and course examinations are described in the study handbook of JKU.

(2) The Master's program "Polymer Chemistry" is concluded by a Master's examination.

(3) The Master's examination consists of two parts: The first part is the successful completion of the mandatory and elective subjects according to §§ 4 and 5.

(4) The second part of the Master's examination is a comprehensive oral examination (1 ECTS) conducted by an examination committee. Prior to being admitted to the Master's examination, students must complete the first part of the Master's examination, the Master's thesis, the Master's thesis seminar, and the free electives.

(5) The second part of the Master's examination starts with a presentation and a defense of the Master's thesis, followed by an oral exam that covers the subject which includes the topic of the Master's thesis and as well as a second subject defined by the advisor of the Master's thesis.

(6) The examination committee consists of three members and is formed by the Vice Rector of Academic Affairs. The candidate may submit a proposal for the committee members. In general, the Academic Advisor of the Master's thesis is a member of the examination committee. The head of the committee suggests the assessment of the oral presentation. The other two examiners suggest the assessment of the examinations in their respective subjects.

§ 10 Academic Degree

(1) Graduates of the Master's program "Polymer Chemistry" are awarded the academic degree „Diplom-Ingenieurin/Diplom-Ingenieur“ abbreviated "Dipl.-Ing." or "Dipl.-Ing. (JKU) oder "DI" or "DI (JKU)".

(2) The certificate confirming the academic degree is issued in German and in English translation.

§ 11 Legal Validity

(1) This Curriculum comes into effect on October 1, 2014.

(2) The curriculum of the Master's program in "Polymer Chemistry" in the version published in the official newsletter of Johannes Kepler University Linz on June 26, 2013, 25th piece, item 177 expires by the end of September 30th, 2014.

(3) § 5 para. 2 as published in the official newsletter of the Johannes Kepler University on June 10th, 2015, 26th piece, item 203 will take effect on October 1st, 2015.

(4) The amendments in § 3 para. 1, § 4 para. 1, § 5 para. 1 and Annex 1, 2 and 3 will come into effect on October 1st, 2016.

(5) § 2 para. 2, 3 and 4, § 3 para. 1, § 4, § 5 para. 1, § 6 para. 1, § 12 para. 1 and 3 and annex 1, 2 and 3 as published in the official newsletter of the Johannes Kepler University Linz on June 22nd, 2018, 26th piece, item 273 will take effect on October 1st, 2018.

(6) § 2 para. 1, 2, 3 and 4, § 3 para. 1 and 3, § 4, § 5 para. 1, § 8 para. 2 and 6, § 9 para. 4, § 12 para. 4 and annex 1, 2 and 3 as published in the official newsletter of the Johannes Kepler University Linz on May 21st, 2019, 26th piece, item 374 will take effect on October 1st, 2019.

(7) § 2 para. 2, and annex 1, 2 and 3 as published in the official newsletter of the Johannes Kepler University Linz on May 19th, 2020, 23th piece, item 252 will take effect on October 1st, 2020.

(8) § 3 para. 4 as published in the official newsletter of the Johannes Kepler University Linz on June 10th, 2021, 29th piece, item 403 will take effect on October 1st, 2021.

(9) § 3 para. 1, § 4 para. 2, § 5 para. 1, § 12 para. 5 and annex 1 and 2 as published in the official newsletter of the Johannes Kepler University Linz on May 30th, 2023, 25th piece, item 439 will take effect on October 1st, 2023.

§ 12 Transitional Provisions

(1) For students who have passed examinations within the curriculum of the Master's program in "Polymer Chemistry" in a previous version, the equivalences listed in the study handbook of JKU (studienhandbuch.jku.at) apply.

(2) In addition to the mentioned equivalences given in the study handbook of JKU, the following equivalence table applies:

Course package in the Master's program "Polymer Chemistry" 2012	Equivalent course package in the Master's program "Polymer Chemistry" 2014
220CHEMPC1V10 + 220CHEMPC1U10: VL+UE Physikalische Chemie der Polymere 1 (2,5 ECTS + 1,5 ECTS) 220CHEMSTRK11: KV Strukturrheologie für Kunststofftechnik (3 ECTS)	491WPHCPCMV10: VL Physikalische Chemie Makromolekularer Stoffe (3,9 ECTS) 497PHCHSTRV13: VL Structural Rheology for Chemistry (2,6 ECTS)
497PHCHPC3V10: VL Physikalische Chemie der Polymere III (2,6 ECTS) 497PHCHPOAV10: VL Polymerarchitekturen (2,6 ECTS)	479POMTPCSV12: VL Physical Chemistry of Surfaces and Interfaces (1,5 ECTS) 497PHCHESPV13: VL Elements of Structuring in Polymers (1,3 ECTS) 491WPHCPC2P10: PR Praktikum aus Physikalischer Chemie II (2,4 ECTS)

(3) In addition to the mentioned equivalences given in the study handbook of JKU, the following equivalence table applies:

Subject package in the Master's program "Polymer Chemistry" 2016	Equivalent subject package in the Master's program "Polymer Chemistry" 2018
497BRTC14: Bridge subject Polymer Chemistry for Chemists (17,1 ECTS) + 497WAF16: Electives Polymer Chemistry (22,7 ECTS)	497BRTC18: Bridge subject Polymer Chemistry for Chemists (17,5 ECTS) + 497WAF18: Electives Polymer Chemistry (22,3 ECTS)
497BRBC14: Bridge subject Polymer Chemistry for Biological Chemists (22,3 ECTS) + 497WAF16: Electives Polymer Chemistry (17,5 ECTS)	497BRBC18: Bridge subject Polymer Chemistry for Biological Chemists (23,5 ECTS) + 497WAF18: Electives Polymer Chemistry (16,3 ECTS)

497BRKT14: Bridge subject Polymer Chemistry for Polymer Engineering and Technologies (23,5 ECTS) + 497WAF16: Electives Polymer Chemistry (16,3 ECTS)	497BRKT18: Bridge subject Polymer Chemistry for Polymer Engineering and Technologies (24,9 ECTS) + 497WAF18: Electives Polymer Chemistry (14,9 ECTS)
---	---

(4) In addition to the mentioned equivalences given in the study handbook of JKU, the following equivalence table applies:

Subject / subject package in the Master's program "Polymer Chemistry" 2018	Equivalent subject / subject package in the Master's program "Polymer Chemistry" 2019
497PHCH14: Physical Chemistry of Polymers (5.2 ECTS)	497PHCH19: Physical Chemistry of Polymers (5 ECTS)
497POCH14: Polymer Chemistry (12.8 ECTS)	497POCH19: Polymer Chemistry (12.5 ECTS)
497POTE14: Polymerization Techniques (9 ECTS)	497POTE19: Polymerization Techniques (8.5 ECTS)
497SOSK16: Soft Skills for Master Polymer Chemistry (6.2 ECTS)	497SOSK19: Soft Skills for Master Polymer Chemistry (6.5 ECTS)
497MAAR14: Master's Thesis Seminar Polymer Chemistry (3 ECTS)	497MAAR19: Master's Thesis Seminar Polymer Chemistry (5 ECTS)
497BRTC18: Bridge subject Polymer Chemistry for Chemists (17.5 ECTS) + 497WAF18: Electives Polymer Chemistry (22.3 ECTS)	497BRCH19: Bridge subject Polymer Chemistry for Bachelors of CCT (18.5 ECTS) + 497ELPC19: Electives Polymer Chemistry (25 ECTS)
497BRBC18: Bridge subject Polymer Chemistry for Biological Chemists (23.5 ECTS) + 497WAF18: Electives Polymer Chemistry (16.3 ECTS)	497BRBC19: Bridge subject Polymer Chemistry for Biological Chemists (24.5 ECTS) + 497ELPC19: Electives Polymer Chemistry (19 ECTS)
497BRKT18: Bridge subject Polymer Chemistry for Polymer Engineering and Technologies (24.9 ECTS) + 497WAF18: Electives Polymer Chemistry (14.9 ECTS)	497BRPE19: Bridge subject Polymer Chemistry for Polymer Engineering and Technologies (22.5 ECTS) + 497ELPC19: Electives Polymer Chemistry (21 ECTS)

(5) For examinations taken in the curriculum version of 2019 until September 30th, 2024, in addition to the equivalences given in the study handbook of JKU the following equivalences are effective:

Subject / subject package in the Master's program "Polymer Chemistry" 2019	Equivalent subject / subject package in the Master's program "Polymer Chemistry" 2023
497BRCH19: Bridge subject Polymer Chemistry for Bachelors of CCT (18.5 ECTS) + 497ELPC19: Electives Polymer Chemistry (25 ECTS)	497BRCH23: Bridge subject Polymer Chemistry for Bachelors of CCT (14.5 ECTS) + 497ELPC19: Electives Polymer Chemistry (29 ECTS)

497BRBC19: Bridge subject Polymer Chemistry for Biological Chemists (24.5 ECTS) + 497ELPC19: Electives Polymer Chemistry (19 ECTS)	497BRBC23: Bridge subject Polymer Chemistry for Biological Chemists (20.5 ECTS) + 497ELPC19: Electives Polymer Chemistry (23 ECTS)
